

Talbro Automotive Forging Begins Trial Production

Talbro Automotive Components Ltd. (Haryana, India) has announced that its forging plant in Bawal, India, has begun trial production runs and will soon commence commercial production. Talbro also announced that it has signed a seven-year technical assistance agreement with Presswerk Krefeld GmbH & Co. KG (PWK) of Germany. The agreement provides for the transfer of technology in the field of hot forged items including tool design, manufacture and maintenance, heat treatment and other related areas.

PWK has its main manufacturing facility at Krefeld in Germany and also has a joint venture in China. The company manufactures housings for lower ball joints and suspension ball joints, steel and aluminum control arms, ball studs and other forgings for the automotive industry.
